Last Calls.....

According to I.M.F and U.N.D.P, Pakistan is said to run out of water by 2025.

The current population of Lahore is approximately 12M. The minimum water requirement per person is 20 liters a day as per WHO (World Health Organization) standards.

The daily water requirement of Lahore is 224M Liters of Water a Day. According to WASA 2016 reports "160 M Liters of groundwater was extracted daily and the groundwater table depth in Lahore city had dropped by 600 feet to 1,000 feet. This is an alarming development as the water table depth in the rest of Punjab is between 30 to 60 feet".

This is 2020-21

Aabshar

Aabshar Water Optimizer holds the potential to save billions of liters of water, energy and restrict CO2 emissions. Our product is easy to install and is affordable ensuring sustainability.

Pakistan's water quality is very poor. There are a lot of impurities (i.e Total Dissolved Solids T.D.S) and dirt that gets stuck under the faucets and blocks the flow of the water.

AABSHAR's patent pending Water Optimizer is designed and developed with materials and structure that the Optimizer can

sustain T.D.S up to 1,000 Lvl.

Safety and Material:

The Optimizer has been made up of FOOD GRADED BRASS safe for people and also sustains poor water quality and T.D.S up to 1,000 Lvl.

Dual Modes:

1
Multiple Stream Mode
saving 85% Water

2
Mist Mode
saving 98% Water
